Hi Krista,

Please see attached EJ Checklist along with the summary below for CUP230002. The bus shelter has been removed from the prior checklist. I wanted to let you know that this week the MMCC met with Supervisor Medina and Chief of Staff Emilio Ramirez to overview the project and the EJ checklist as presented below. Please let me know what additional information you may need upon review.

Summary of Environmental Justice

- 84.99 acres of owned land and 45% of the land will be undeveloped, 38.6 acres. Approximately, 12.67 acres will be landscaped areas, basins, or landscaped slopes. And 24.6 acres are grave sites. This is near 90% of passive land use.
- The site entry along Garfield will include enhanced landscaping:
  - (19) nineteen – 18' brown trunk height date palm trees
  - (2) two - 36" box flowering Accent Trees (Palo Verde or Chitalpa)
  - 1-5 gallon shrubs and ground cover
  - Guard Shack
  - Decorative Fencing
- The project will include new Fuel Modification Zones for fire protection. Trees planned for the entry include fruitless olive and date palm, while the interior roads and pathways would be lined with accent trees such as Palo Verde and Marina Strawberry, and shade trees such as Jacaranda, Australian willow, evergreen Chinese Elm and Coast Live Oak.
- There will be approximately 1,780 linear feet of trails on-site and internal trail systems (walking paths) for cemetery use are also provided. Chain link fencing along the east perimeter will follow the limits of grading and landscape improvements to allow for the existing regional trail network to cross onto the property, outside of the fence line, and continue off-site to regional trails. There are controlled by gates on the private property along the east property line that connect to the regional trail if patrons want to walk along the internal regional trail or to the offsite regional trail.
- Approximately 3,062 linear feet of a new water line will be installed from 270 feet south of Senola Avenue to Garfield Road at end of easterly cul-de-sac. The water line will upgrade an existing 4" water line to an 8" water line. Residents adjacent to this water line installation will receive new lateral connections to the 8" line.
- The two-story approximately 11,079 SF, chapel would be located south of the

entrance at Garfield Road, south of the Ceremonial Cleansing Facility, and is designed for family-oriented gatherings to celebrate the life of the deceased. It will provide permanent offices to support making funeral and burial arrangements, including religious services ancillary to the CCF, with family attendance.

The Muslim Mortuary and Cemetery Committee (MMCC) is an independent non-profit organization, licensed by the State of California Cemetery and Funeral Bureau, providing Islamic burial services to over 5,000 families through established cemeteries in Anaheim, Westminster, LaVerne, and Colton since 1991. The MMCC office is located in Garden Grove and staffed with a dedicated Funeral Director. Its operations rely on highly trained staff and volunteers to provide funeral services in accordance with the Islamic practices. Each of the existing cemeteries are smaller, with between 100 and 1,250 burial plots. The existing cemeteries cannot be expanded, and a new cemetery, more centrally located in Southern California that can provide a long-term solution for burial and funeral services, is needed. The MMCC proposes this Project to provide a long-term solution for burial services for the Muslim community of Southern California and the local Riverside County community.

Thanks,
